National Immunisation Program Queensland Schedule

Commencing 1 March 2008

i M M U N I S E
AUSTRALIA PROGRAM
An Australian, State and Territory
Governments Initiative

AGE	VACCINES				Special funded vaccines (enquire with your immunisation service provider)	
	<p>Infanrix Hexa™ must be reconstituted prior to administration – shake the suspension in the pre-filled syringe, add entire contents with the Hib pellet, shake until the pellet is completely dissolved. The 0.5 mL reconstituted vaccine is a slightly more cloudy suspension.</p>				Additional vaccine for High Risk Children	Additional vaccines for Aboriginal & Torres Strait Islander children
Birth	Hepatitis B birth dose administered within 7 days of birth				As for routine childhood immunisation PLUS the vaccines below	As for routine childhood immunisation PLUS the vaccines below
2 months	Infanrix Hexa™	Prevenar™	RotaTeq™			
4 months	Infanrix Hexa™	Prevenar™	RotaTeq™			
6 months	Infanrix Hexa™	Prevenar™	RotaTeq™			
12 months	*Comvax™ / Hiberix™			Priorix™	Meningitec™	Prevenar™
18 months					Varilrix™	Vaqa™
24 months						Pneumovax 23™ Vaqa™
4 years	Infanrix-IPV™			Priorix™		Pneumovax 23™

* Comvax™ will be replaced by a booster dose of monovalent Hib (Hiberix™) in 6 months time (approximately September 2008) because by then all those children who completed their primary vaccinations by 1st March 2008 will have received their booster dose of Comvax™

Regardless of previous vaccinations, children in Queensland should receive the vaccines listed above.

1 March 2008
