

Educational facilities

Logan students now have the opportunity to step outside their classroom and learn about the environment and wildlife first hand.

Educational facilities built into the SouthWest 1 development, provide students with an interactive and innovative way to learn about Berrinba's natural environment.

Interpretive centre:

- Interactive LCD screens providing a wide variety of information
- Viewing platform over the wetlands linked to the tracks along the water
- School tours and projects
- Shelter available for hire for outdoor lessons
- Tours targeted at a range of age groups to learn about the business/ environment interaction and sustainable development
- Range of projects available including adopting an area of wetland to study and nurture or a study of the wildlife within the area.

Webcams:

- Footage of wildlife collected via webcams placed within the site is available for school projects or for scientific research projects.
