Commencement of a wastewater (sewerage) network upgrade in Regents Park will commence in June 2019

On behalf of Logan City Council, Logan Water Infrastructure Alliance is pleased to announce the start of a wastewater (sewerage) upgrade project in Regents Park. The new infrastructure will enhance the operational efficiency of the wastewater network and reduce potential wastewater overflows in wet weather.

Activities in your area

Project works will involve the installation of a new maintenance hole, an emergency wastewater storage pipe and associated infrastructure. Works will be carried out using an open trench construction method.

Location

The construction will be carried out in two locations: Bennett Drive Park between 47 and 60 Bennett Drive and Haldham Park behind 20 to 24 Solandra Circuit, Regents Park, (please refer to the maps overleaf).

Timing

Vegetation removal and cultural heritage investigations will commence in June 2019 with construction starting in July 2019. Work is expected to be completed in August 2019. The timing and duration of the works is subject to construction and weather conditions.

What to expect

Logan Water Infrastructure Alliance will make every effort to minimise disruption to the local community and environment during these works. All works will be carried out in accordance with relevant project plans and legislative requirements.

Due to the nature of the works, some localised construction impacts may be experienced at times including:

- Increased levels of noise and dust. The site team will implement mitigation measures to reduce these impacts as much as practical.

- Restricted pedestrian access to parts of Bennett Drive Park. Signs will be installed to advise pedestrians of alternate routes.

- Some vegetation clearing within the work zone to make way for construction. Any vegetation removal will be carried out in accordance with Council and State Government requirements.

- Short-term use of bypass pumps and generators may be required to divert wastewater flows to neighbouring maintenance holes.

- Frequent truck movements to and from work sites to allow machinery / materials to be delivered and excavated materials removed.

- Construction will generally occur between 7.00am and 5.00pm Monday to Friday. However, due to the nature of the works, some weekend works may be required.

Logan Water Infrastructure Alliance thanks you for your cooperation and apologies for any inconvenience you may experience during these essential works.
