1 Designation of general waste and green waste collection area

Pursuant to section 5(a) of Local Law No. 8 (Waste Management) 2018, the entire local government area of Logan is designated as the area in which Council may conduct general waste and green waste collection. Section 3 of this policy specifies the particular premises from which Council will collect general waste.

Section 5(a) Designation of areas—The local government may designate areas within its local government area in which the local government may conduct general waste or green waste collection.

2 Requirement to arrange collection

Commercial premises and industrial premises are not required to use Council's collection service for general waste, but if they do not use Council's collection service, they must arrange their own private supplier.

Pursuant to section 6(b) of Local Law No. 8 (Waste Management) 2018, Council requires the owner or occupier of all commercial premises which Council does not collect from to arrange for removal of general waste from the premises.

3 Premises from which Council will collect general waste

The waste collection services detailed in this procedure, the Waste Collection Services Policy, and associated waste management utility charges, will be provided/applied to the following premises in the Logan local government area:

- all domestic premises; and
- all commercial premises which request Council's collection service,

with the following exceptions:

Exceptions

- a) Premises which Council determines are unreasonably remote or unreasonably difficult to access.

Upon request by the owner or occupier of premises, Council will notify them if the premises are considered unreasonably remote or unreasonably difficult to access.

The occupants of domestic premises to which a waste collection service is not supplied must make their own waste disposal arrangements. They shall be entitled to apply for exemption from waste disposal charges at Council's waste facilities for the weekly disposal of a quantity of waste approximately equivalent to the contents of two wheelie bins.

Note: Premises falling within this exception will change over time, e.g. as urbanised areas expand or roads are upgraded.

- b) Premises which are uninhabitable due to fire or similar damage and the owner or occupier has notified Council they do not require waste collection services while it remains uninhabitable.

Note: A habitable property becoming vacant is not grounds for exemption from waste collection services and associated utility charges.

- c) Dwellings where the dwelling is greater than 60 metres from the front property boundary in the Environmental Management and Conservation zone, Rural zone or Rural Residential zone can seek an exemption by the owner of the premises notifying Council that they will make their own arrangements for general waste collection/disposal and they opt out of Council's collection service. Under this exception, no exemption from payment of waste disposal charges at waste facilities shall be provided.

4 Types, frequency and conditions of waste collection services

- a) The Schedule to this procedure sets out the types, frequency and conditions of Council's waste collection services.
- b) If Council prescribes a form for applying for a waste collection service, the application must be made in compliance with that prescribed form.

5 Recyclable waste

- a) For the definition of recyclable waste under Local Law No. 8 (Waste Management) 2018, Council declares the following to be recyclable waste in the Logan local government area:
 - (i) Plastic - all rigid plastics 1 to 5:
 - PET - polyethylene terephthalate
 - HDPE - high density polyethylene
 - PVC - polyvinyl chloride
 - PP - polypropylene
 - LDPE - low density polyethylene
 - PS - non-expanded polystyrene
 - (ii) Paper - all paper including newspaper, office paper, magazines/brochures, envelopes, cardboard, package board and liquid paper board, but excluding tissue paper and waxed cardboard
 - (iii) Glass - coloured glass and clear glass bottles and jars, but excluding ceramics and plate glass
 - (iv) Steel - steel cans and aerosols
 - (v) Aluminium - aluminium cans and tins.
- b) Only recyclable waste may be placed in a standard general waste container for recyclable waste.
- c) In accordance with the waste collection contract, the waste collection contractor will not collect the contents of a recyclable waste bin if it appears to the waste collection contractor that the bin has in excess of 40 percent of material that is not recyclable waste.
- d) The procedure for managing the presentation of grossly contaminated recycling bins on a repeated basis will be as follows:
 - (i) Council will, on a daily basis, receive from its waste collection contractor reports of locations where grossly contaminated recycling bins have been presented.
 - (ii) The Health, Environment & Waste branch may record and analyse this data for the purpose of identifying users of recyclable waste bins who regularly present grossly contaminated recycling bins.
 - (iii) Correspondence requesting improved recycling behaviours may be forwarded to the owners and/or occupiers of any serviced premises where the waste collection contractor has reported the presentation of a grossly contaminated recycling bin on at least three occasions in any six-month period. The correspondence may advise that, should recycling behaviours not improve, possible future sanctions could include removal of the recyclable waste bin for a period of six months with no corresponding reduction in waste management utility charges.
 - (iv) The Health, Environment & Waste branch may commence surveillance of the contents of recyclable waste bins at premises to which correspondence under section 5(d)(iii)

above has been sent. If, within three months of the date of issue of correspondence under section 5(d)(iii) above, a Health, Environment & Waste branch officer confirms that a grossly contaminated recycling bin has been presented, a second written warning may be issued. This second written warning will advise the owner and/or occupier that, should presentation of a grossly contaminated recycling bin be confirmed within the following three-month period, then the recyclable waste bin will be removed for a period of six months with no corresponding reduction in waste management utility charges.

- (v) If, within three months of the date of issue of correspondence under section 5(d)(iv) above, a Health, Environment & Waste branch officer confirms that a grossly contaminated recycling bin has again been presented, the recyclable waste bin in question may be removed from the property with no corresponding reduction in waste management utility charges. Correspondence advising of the application of the sanction will be sent to the owner and/or occupier.
- (vi) Any removed recyclable waste bins may be returned to the property in question upon:
 - a) the elapse of six months; or
 - b) a change in occupants of the property.
- (vii) If, following the return of the recyclable waste bin after being removed for a six month period, a Health, Environment & Waste branch officer confirms that a grossly contaminated recycling bin has again been presented, the recyclable waste bin in question may be permanently removed from the property with no corresponding reduction in waste management utility charges, until such time that there is a change of occupants of the property.

6 Pavement indemnity and release

For waste collection services where the waste collection vehicle has to enter private property (e.g. driveway or internal roads), the owner of the premises must provide an indemnity and release in favour of Council and the waste collection contractor in respect of any claims or liability arising from any damage to the pavement of any private driveway or roadway caused by the collection vehicles.

Where an indemnity and release has not been provided, Council may:

- a) pursuant to sections 9 and 11 of Local Law No. 8 (Waste Management) 2018, require the waste containers to be stored at a particular place and/or designate the location where the waste containers are to be placed for collection, so that the collection vehicle is not required to enter the private property;
- b) change the type of waste collection service so that the collection vehicle is not required to enter the private property; or
- c) remove the waste containers from the property with no corresponding reduction in waste management utility charges until the indemnity and release is provided.

7 Definitions

Definitions for terms used within the procedure can be found in the Waste Collection Services Policy (DM: 14661112)

8 Schedule – Types, frequency and conditions of waste collection services

1. Domestic premises: Dwelling houses (including secondary dwellings)

1A. Standard wheelie bin collection service	
Service	The standard default service that will be provided to dwelling houses is a weekly 240 litre wheelie bin collection service for domestic waste and fortnightly 240 litre wheelie bin collection service for recyclable waste.
	For dwelling houses with a secondary dwelling (e.g. granny flat), a waste collection service for the secondary dwelling can be requested. This is treated as an additional waste collection service. See <i>Item 7—Additional waste collection services for domestic premises</i> .

1B. Alternative wheelie bin collection services	
Service	The following collection services are alternatives to the standard default wheelie bin collection service that can be specifically requested by written application.
	Domestic waste 140 litre weekly and recyclable waste 140 litre fortnightly
	Domestic waste 140 litre weekly and recyclable waste 240 litre fortnightly
	Domestic waste 140 litre weekly and recyclable waste 360 litre fortnightly
	Domestic waste 240 litre weekly and recyclable waste 140 litre fortnightly
	Domestic waste 240 litre weekly and recyclable waste 360 litre fortnightly

2. Domestic premises: Dual occupancy, including Dual occupancy (auxiliary unit)

2A. Standard wheelie bin collection service	
Service	The standard default collection service that will be provided to each dwelling is a weekly 240 litre wheelie bin for domestic waste and fortnightly 240 litre wheelie bin for recyclable waste.
	This applies to each dual occupancy dwelling regardless of who they are being occupied by.

2B. Alternative wheelie bin collection services	
Service	The following collection services are alternatives to the standard default wheelie bin collection service that can be specifically requested by written application for each dwelling.
	Domestic waste 140 litre weekly and recyclable waste 140 litre fortnightly
	Domestic waste 140 litre weekly and recyclable waste 240 litre fortnightly
	Domestic waste 140 litre weekly and recyclable waste 360 litre fortnightly
	Domestic waste 240 litre weekly and recyclable waste 140 litre fortnightly
	Domestic waste 240 litre weekly and recyclable waste 360 litre fortnightly

3. Domestic premises: Multiple dwellings—strata-titled

3A. Standard wheelie bin collection service	
Service	The standard default service that will be provided to each dwelling is a weekly 240 litre wheelie bin collection service for domestic waste and fortnightly 240 litre wheelie bin collection service for recyclable waste.
	For multiple dwellings – strata titled that contain 11 or more dwellings, the collection of wheelie bins shall be undertaken within the property rather than on the footpath, where practical.

3B. Alternative wheelie bin collection services	
Service	The following collection services are alternatives to the standard default wheelie bin collection service that can be specifically requested by written application for each dwelling.
	Domestic waste 140 litre weekly and recyclable waste 140 litre fortnightly
	Domestic waste 140 litre weekly and recyclable waste 240 litre fortnightly
	Domestic waste 140 litre weekly and recyclable waste 360 litre fortnightly
	Domestic waste 240 litre weekly and recyclable waste 140 litre fortnightly
	Domestic waste 240 litre weekly and recyclable waste 360 litre fortnightly
	Domestic waste 240 litre weekly and no recyclable waste Only available when a Council officer has determined that it is not possible for any other wheelie bin or bulk bin service option incorporating recycling to be offered. This could be because of lack of space to store bins on-site, inability of the collection vehicle to access bins on-site or lack of space on the footpath to present bins for servicing.

3C. Bulk bin collection services													
Service	Bulk bin collection services for domestic waste and recyclable waste are also available, as an alternative to wheelie bins. For this service: <ul style="list-style-type: none"> • all dwellings in the community titles scheme must be serviced by the bulk bins; • the bulk bins for the domestic waste component must be of the same capacity; and • no combination of bulk and wheelie bins is permitted under this Item 3C, that is, the service must be comprised of all bulk bins and no wheelie bins. Combined wheelie bin/bulk bin services are set out in <i>Item—3D. Combined domestic waste wheelie bin and recyclable waste bulk bin service</i> and <i>3E. Combined domestic waste bulk bin and recyclable waste wheelie bin service</i>. <p>The volume and frequency options for this bulk bin service are as follows:</p> <table border="1"> <tr> <td>Domestic waste</td> <td>1,000, 1,500, 2,000 or 3,000 litres, serviced 1, 2 or 3 times per week</td> </tr> <tr> <td>Recyclable waste</td> <td>1,100 litres, serviced once per week</td> </tr> </table> <p>Volume options and minimum dwellings required The bulk bin service is charged to each dwelling, based on the approximate volume of weekly waste to be collected per dwelling. The available volume options (approximate volume per dwelling per week) for this bulk bin service are set out in the table below. The table also sets out the minimum number of dwellings required for each volume option. This is in order to maintain approximate equity in the standard volume of waste collectable per dwelling in Logan. A minimum number of dwellings is required for premises to be eligible for at least 1 bulk bin.</p> <table border="1"> <thead> <tr> <th>Volume options (approx) per dwelling per week</th> <th>Minimum dwellings</th> </tr> </thead> <tbody> <tr> <td>Domestic waste 240 litre once/week and recyclable waste 120 litre once/week</td> <td>7</td> </tr> <tr> <td>Domestic waste 240 litre 2 times/week and recyclable waste 120 litre once/week</td> <td>8</td> </tr> <tr> <td>Domestic waste 240 litre 3 times/week and recyclable waste 120 litre once/week</td> <td>11</td> </tr> </tbody> </table>	Domestic waste	1,000, 1,500, 2,000 or 3,000 litres, serviced 1, 2 or 3 times per week	Recyclable waste	1,100 litres, serviced once per week	Volume options (approx) per dwelling per week	Minimum dwellings	Domestic waste 240 litre once/week and recyclable waste 120 litre once/week	7	Domestic waste 240 litre 2 times/week and recyclable waste 120 litre once/week	8	Domestic waste 240 litre 3 times/week and recyclable waste 120 litre once/week	11
	Domestic waste	1,000, 1,500, 2,000 or 3,000 litres, serviced 1, 2 or 3 times per week											
	Recyclable waste	1,100 litres, serviced once per week											
	Volume options (approx) per dwelling per week	Minimum dwellings											
	Domestic waste 240 litre once/week and recyclable waste 120 litre once/week	7											
	Domestic waste 240 litre 2 times/week and recyclable waste 120 litre once/week	8											
	Domestic waste 240 litre 3 times/week and recyclable waste 120 litre once/week	11											
	Domestic waste	1,000, 1,500, 2,000 or 3,000 litres, serviced 1, 2 or 3 times per week											
	Recyclable waste	1,100 litres, serviced once per week											
	Volume options and minimum dwellings required The bulk bin service is charged to each dwelling, based on the approximate volume of weekly waste to be collected per dwelling. The available volume options (approximate volume per dwelling per week) for this bulk bin service are set out in the table below. The table also sets out the minimum number of dwellings required for each volume option. This is in order to maintain approximate equity in the standard volume of waste collectable per dwelling in Logan. A minimum number of dwellings is required for premises to be eligible for at least 1 bulk bin.												
Volume options (approx) per dwelling per week													
Domestic waste 240 litre once/week and recyclable waste 120 litre once/week													
Domestic waste 240 litre 2 times/week and recyclable waste 120 litre once/week													
Domestic waste 240 litre 3 times/week and recyclable waste 120 litre once/week													
Minimum dwellings													
7													
8													
11													

3C. Bulk bin collection services		
	Domestic waste 140 litre once per week and recyclable waste 70 litre once/week	11
	Domestic waste 140 litre 2 times/week and recyclable waste 70 litre once/week	12
<p>Acceptable volume variation per dwelling</p> <p>The weekly volume per dwelling is approximate only as a partial bulk bin cannot be supplied. Therefore, the number of bulk bins supplied are rounded to the nearest whole number of bins. This rounding may result in a lesser or greater volume per dwelling per week than the exact wheelie bin equivalent, but Council has set the volume variations in the table below (lower and upper) as an acceptable range that will not affect the bulk bin service provided (“acceptable volume range”).</p> <p>A weekly volume per dwelling outside of the acceptable volume range is not permitted and a different bulk bin size or servicing frequency needs to be selected.</p>		
	Acceptable volume range	
	Volume variation - lower	Volume variation - upper
Domestic waste	Minus 34 litres/dwelling Therefore: 140L service: No less than 106L 240L service: No less than 206L	Plus 33 litres/dwelling Therefore: 140L service: No more than 173L 240L service: No more than 273L
Recyclable waste	Minus 35 litres/dwelling Therefore: 70L service: No less than 35L 120L service: No less than 85L	Plus 37 litres/dwelling Therefore: 70L service: No more than 107L 120L service: No more than 157L
<p>Number of bulk bins</p> <p>The number of bulk bins supplied to the overall premises will be calculated based on the number of dwellings, the volume option selected, the bulk bin size selected and the collection frequency selected.</p> <p>The calculation is designed to produce approximate equity in the standard volume of weekly waste collectable from domestic premises in Logan (within the acceptable volume range).</p>		
Step	Calculation	Example (using 32 dwellings)
1	The total waste storage volume that will be provided for the overall premises will be calculated by multiplying the number of dwellings by the selected volume per dwelling.	If 240 litre domestic waste volume per dwelling is selected— 32 dwellings multiplied by 240 litres = 7,680 litres.
2	The number of bins to be provided will be calculated by dividing the total domestic waste storage volume by the capacity of the bin sought, then dividing by the collection frequency sought (rounded off to the nearest whole number of bins).	If 1,100 litre bins, 3 times/week is selected— 7,680 litres divided by 1,100 litres = 6.98 divided by 3 = 2.32 (rounded off) = 2 x 1,100 litre bin serviced three times weekly.
3	Check that the bulk bin volume per dwelling is the within the acceptable volume range— Number of bins multiplied by the bulk bin size selected multiplied by the	2 bins multiplied by 1,100 litres = 2,200 multiplied by 3 times/week = 6,600 litres, divided by 32 dwellings = 206.25 litres per dwelling.

3C. Bulk bin collection services	
	<p>servicing frequency selected, divided by the number of dwellings.</p> <p>If the volume per dwelling is not within the acceptable volume range, a different bulk bin size or servicing frequency needs to be selected.</p> <p>This is within the acceptable volume range (the lower volume variation being 206 litres per dwelling).</p>
Conditions	<p>Storage and collection point</p> <ol style="list-style-type: none"> 1. A suitable location must be available for the storage and collection of the bulk bins: <ol style="list-style-type: none"> (a) 1,100 litre bulk bins are manually manoeuvred by the driver onto rear-lift collection vehicles so the collection point for 1,100 litre bulk bins may be on the footpath provided: <ol style="list-style-type: none"> (i) pathways leading to the collection point are paved and have a manageable gradient (maximum 1:15) and are free of steps, stairs or other impediments; (ii) there is adequate space on the footpath for servicing; (iii) if on-site property managers are not able to move the bins to the footpath, it will be necessary for the bulk bins to be stored in an enclosure at the immediate street frontage. The bulk bins in the enclosures need to be easily accessible. That is, it must always be possible to remove a bulk bin without having to move any other bins stored in the enclosure. (b) The collection point for all other bulk bins must be on the property (1,100 litre bins may also be serviced on the property): (c) The bins must be stored in easily accessible enclosures: <ol style="list-style-type: none"> (i) for 1,100 litre bulk bins (which are manually manoeuvred) that means an enclosure which complies with (a)(iii) above and the path of travel to the enclosure complies with (a)(i) above; (ii) all other bulk bins are serviced by "front-lift" collection vehicles which means that the front of the truck must be able to approach and access the front of the bulk bin without manual manoeuvring of the bin. The enclosures must not inhibit access by the collection vehicle. (d) The collection vehicle will only move in a forward direction while entering, on and leaving the property. That is, the collection vehicle shall not be required to reverse on the property other than to perform a three-point turn. (e) There must be unobstructed access for the collection vehicle. Managers of these domestic premises must ensure that measures are taken (eg. installation of removable locking posts) to ensure that vehicles do not park in turning areas or otherwise block access on collection days. 2. The waste collection contractor must confirm that they are able to enter the premises and perform the required service. 3. A pavement indemnity and release is required for all bulk bin services except for the 1,100 litre footpath collection. See <i>Section F—Pavement indemnity and release</i>. <p>Collection days</p> <ol style="list-style-type: none"> 4. Bulk bin services are only available on a day from Monday to Friday. <p>Applicant</p> <ol style="list-style-type: none"> 5. The application must be made in writing by the body corporate (or the original owner of the community titles scheme land immediately before the establishment of the scheme).

3D. Combined domestic waste wheelie bin and recyclable waste bulk bin service	
Service	An alternative collection service is available for each dwelling to have the following combined wheelie bin/bulk bin service.
	Domestic waste 140 litre or 240 litre wheelie bin per dwelling, serviced weekly
	Recyclable waste 70 litres per dwelling based on use of a shared 1,100 litre bulk bin, serviced weekly, as set out below:
	Volume per dwelling and minimum dwellings required An approximate volume per dwelling per week for the recyclable waste component of this service is 70 litres per week. This service is only available to premises with a minimum of 11 dwellings. This is in order to maintain approximate equity in the standard volume of recyclable waste collectable per dwelling in Logan, because the only bulk bin recyclable waste container available is 1,100 litres. To make the service available to premises with less than 11 dwellings, would result in each dwelling receiving a higher recyclable waste storage capacity than 70 litres.
	Acceptable volume variation per dwelling See the acceptable volume range for recyclable waste set out in <i>Item 3C. Bulk bin collection services—Acceptable volume variation per dwelling.</i>
Number of bulk bins Calculated in accordance with the calculation set out in <i>Item 3C. Bulk bin collection services—Number of bulk bins</i> , using 70 litres per dwelling and 1,100 litres as the bulk bin size.	
Conditions	Same as <i>Item 3C. Bulk bin collection services—Conditions.</i>

3E. Combined domestic waste bulk bin and recyclable waste wheelie bin service														
Service	An alternative collection service is available for each dwelling to have the following combined bulk bin/wheelie bin service. All domestic waste bulk bins utilised under this service option must be of the same capacity (e.g. all 1,000 litre bins, or all 1,100 litre bins, etc...).													
	Recyclable waste 140, 240 or 360 litre wheelie bin, serviced weekly													
	Domestic waste 120 or 240 litres per dwelling based on shared use of 1,000, 1,100, 1,500, 2,000 or 3,000 litre bulk bin, as set out below:													
	Volume per dwelling and minimum dwellings required The bulk bin service is charged to each dwelling, based on the approximate volume of weekly waste to be collected per dwelling. The available volume options (approximate volume per dwelling per week) for the bulk bin component of the service is set out in the table below. The table also sets out the minimum number of dwellings for each volume option. This is because there is a need to maintain approximate equity in the standard volume of domestic waste collectable per dwelling in Logan. A minimum number of dwellings is required for premises to be eligible for at least 1 bulk bin.													
	<table border="1"> <thead> <tr> <th>Volume options (approx. per dwelling per week)</th> <th>Bulk bin size</th> <th>Minimum dwellings</th> </tr> </thead> <tbody> <tr> <td rowspan="5">240 litre</td> <td>1000</td> <td>4</td> </tr> <tr> <td>1100</td> <td>5</td> </tr> <tr> <td>1500</td> <td>6</td> </tr> <tr> <td>2000</td> <td>8</td> </tr> <tr> <td>3000</td> <td>11</td> </tr> </tbody> </table>	Volume options (approx. per dwelling per week)	Bulk bin size	Minimum dwellings	240 litre	1000	4	1100	5	1500	6	2000	8	3000
Volume options (approx. per dwelling per week)	Bulk bin size	Minimum dwellings												
240 litre	1000	4												
	1100	5												
	1500	6												
	2000	8												
	3000	11												

3E. Combined domestic waste bulk bin and recyclable waste wheelie bin service			
	140 litre	1000	6
		1100	7
		1500	9
		2000	12
		3000	18
<p>Acceptable volume variation per dwelling See the acceptable volume range for domestic waste set out in <i>Item 3C. Bulk bin collection services—Acceptable volume variation per dwelling.</i></p>			
<p>Number of bulk bins Calculated in accordance with the calculation set out in <i>Item 3C. Bulk bin collection services—Number of bulk bins.</i></p>			
Conditions	For the bulk bin service, the conditions in <i>Item 3C. Bulk bin collection services—Conditions</i> apply.		

3F. Body corporate (or equivalent) bin collection services			
Service	In the event that a body corporate (or equivalent) considers that the options listed previously provide inadequate domestic waste or recyclable waste volume entitlements, or if bins are required for common areas, it will be possible for the body corporate (or equivalent) to apply for the following additional bin collection services.		
	Domestic waste	140 litre wheelie bin, serviced once per week	
		240 litre wheelie bin, serviced once per week	
		1,000 litre bulk bin, serviced 1, 2 or 3 times per week	
		1,100 litre bulk bin, serviced 1, 2 or 3 times per week	
		1,500 litre bulk bin, serviced 1, 2 or 3 times per week	
		2,000 litre bulk bin, serviced 1, 2 or 3 times per week	
		3,000 litre bulk bin, serviced 1, 2 or 3 times per week	
	Recyclable waste	140 litre wheelie bin, serviced once per fortnight	
		240 litre wheelie bin, serviced once per fortnight	
		360 litre wheelie bin, serviced once per fortnight	
		1,100 litre bulk bin, serviced once per week	
	Conditions	<ol style="list-style-type: none"> The domestic waste management utility charges for these services will apply to the body corporate. The body corporate must as soon as practical advise Council of any change to its postal address so that rates notices can be delivered. Council may cancel the service and remove the additional bins if the associated waste management utility charges have not been paid within sixty days of the due date for payment of the charges. The application by the body corporate (or equivalent) for these additional bin collection services must acknowledge the above conditions. For the bulk bin component of this service, the conditions in <i>Item 3C. Bulk bin collection services—Conditions</i> also apply. 	

4. Domestic premises: Multiple dwellings—not strata-titled

4A. Standard wheelie bin collection service	
Service	<p>The standard default service that will be provided to all multiple dwellings is a weekly 240 litre wheelie bin domestic waste service and fortnightly 240 litre wheelie bin recyclable waste service.</p> <p>For multiple dwellings – non strata titled that contain 11 or more dwellings, the collection of wheelie bins shall be undertaken within the property rather than on the footpath, where practical.</p>

4B. Alternative wheelie bin collection services	
Service	<p>The following collection services are alternatives to the standard default wheelie bin collection service that can be specifically requested by written application for each dwelling.</p> <p>Domestic waste 140 litre weekly and recyclable waste 140 litre fortnightly</p> <p>Domestic waste 140 litre weekly and recyclable waste 240 litre fortnightly</p> <p>Domestic waste 140 litre weekly and recyclable waste 360 litre fortnightly</p> <p>Domestic waste 240 litre weekly and recyclable waste 140 litre fortnightly</p> <p>Domestic waste 240 litre weekly and recyclable waste 360 litre fortnightly</p> <p>Domestic waste 240 litre weekly and no recyclable waste</p> <p>Only available when a Council officer has determined that it is not possible for any other wheelie bin or bulk bin service option incorporating recycling to be offered. This could be because of lack of space to store bins on-site, inability of the collection vehicle to access bins on-site or lack of space on the footpath to present bins for servicing.</p>

4C. Alternative combination collection services														
Service	<p>The owners of multiple dwelling premises that are not strata-titled are permitted to use any combination of the following service types on the condition that the total domestic waste and recyclable waste entitlement for each dwelling on the property is at least 120 litres of domestic waste and 70 litres of recyclable waste weekly.</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td rowspan="7" style="width: 20%;">Domestic waste</td> <td>140 litre wheelie bin, serviced once per week</td> </tr> <tr> <td>240 litre wheelie bin, serviced once per week</td> </tr> <tr> <td>1,000 litre bulk bin, serviced 1, 2 or 3 times per week</td> </tr> <tr> <td>1,100 litre bulk bin, serviced 1, 2 or 3 times per week</td> </tr> <tr> <td>1,500 litre bulk bin, serviced 1, 2 or 3 times per week</td> </tr> <tr> <td>2,000 litre bulk bin, serviced 1, 2 or 3 times per week</td> </tr> <tr> <td>3,000 litre bulk bin, serviced 1, 2 or 3 times per week</td> </tr> <tr> <td rowspan="4">Recyclable waste</td> <td>140 litre wheelie bin, serviced once per fortnight</td> </tr> <tr> <td>240 litre wheelie bin, serviced once per fortnight</td> </tr> <tr> <td>360 litre wheelie bin, serviced once per fortnight</td> </tr> <tr> <td>1,100 litre bulk bin, serviced once per week</td> </tr> </table> <p>Acceptable volume variation per dwelling for the bulk bin service See the acceptable volume range for set out in <i>Item 3C. 	360 litre wheelie bin, serviced once per fortnight													
	1,100 litre bulk bin, serviced once per week													

4C. Alternative combination collection services	
	If the number of bulk bins calculated is less than 1 bulk bin, then that bulk bin service is not available. This is because there is a need to maintain approximate equity in the standard volume of domestic and recyclable waste collectable per dwelling in Logan. A minimum number of dwellings is required for premises to be eligible for at least 1 bulk bin.
Conditions	For the bulk bin service, the conditions in <i>Item 3C. Bulk bin collection services—Conditions</i> apply.

5. Domestic premises: Retirement facility with independent living units

Service	A retirement facility with independent living units is subject to the same standard wheelie bin collection service, alternative collection service option and bulk bin collection service option available to multiple dwellings, that is:	
	If the retirement facility is strata-titled	<i>Item 3—Domestic premises: Multiple dwellings—strata-titled applies.</i> In applying Item 3, each independent living unit is treated as a dwelling.
	If the retirement facility is not strata-titled	<i>Item 4—Domestic premises: Multiple dwellings—not strata-titled applies.</i> In applying Item 4, each independent living unit is treated as a dwelling.
	Retirement facilities with independent living units which have central dining facilities may also apply for an alternative service of one 240 litre domestic waste and one 240 litre recycling bin to be issued for every two units within the domestic premises. For this alternative service, a waste management utility charge of 50% of the standard 240 litre domestic waste and one 240 litre recycling bin will be applied to each unit, or if the premises is not strata-titled, the full waste management utility charge for each standard 240 litre domestic waste wheelie bin and the 240 litre recyclable waste wheelie bin will be applied to the parent property.	
Conditions	For bulk bin collection services, the conditions in <i>Item 3C. Bulk bin collection services—Conditions</i> apply.	

6. Domestic premises: All other domestic premises

Service	Any domestic premises not specifically provided for in Items 1 to 5 of this Schedule is subject to the same standard wheelie bin collective service, alternative collection service option and bulk bin collection service option available to multiple dwellings, that is:	
	If the domestic premises is strata-titled	<i>Item 3—Domestic premises: Multiple dwellings—strata-titled applies.</i> In applying Item 3, each lot is treated as a dwelling.
	If the domestic premises is not strata-titled	<i>Item 4—Domestic premises: Multiple dwellings—not strata-titled applies.</i> In applying Item 4: <ol style="list-style-type: none"> 1. Subject to paragraphs 2 and 3 below, each dwelling or unit is treated as a dwelling. 2. If any of the dwellings or units contain more than 6 bedrooms, then every 6 bedrooms (or part) across the entire site are deemed to comprise one dwelling, rounded to the nearest whole number. To remove doubt, this applies to the entire site even if some dwellings or units on the site have less than 6 bedrooms. 3. If the domestic premises is not grouped into separate dwellings or units, every 6 bedrooms (or part) across the

		<p>entire site are deemed to comprise one dwelling, rounded to the nearest whole number.</p> <p>Example 1— A rooming accommodation has 12 self-contained units, each containing 6 bedrooms. In applying Item 4, there are 12 dwellings.</p> <p>Example 2— A rooming accommodation has 12 self-contained units, each containing 8 bedrooms. In applying Item 4, as there are more than 6 bedrooms comprising one dwelling, then every 6 bedrooms (or part) across the entire site are deemed to comprise a dwelling. The total number of bedrooms across the entire site is 96. 96 bedrooms divided by 6 is 16. There are deemed to be 16 dwellings.</p> <p>Example 3— A rooming accommodation has 12 self-contained units. 6 units contain 8 bedrooms each. 6 units contain 5 bedrooms each. As there is at least one dwelling on the site with more than 6 bedrooms, every 6 bedrooms across the entire site are deemed to comprise a dwelling. The total number of bedrooms across the entire site is 78 bedrooms. 78 divided by 6 is 13. There are deemed to be 13 dwellings.</p> <p>Example 4— A rooming accommodation has 8 bedrooms. In applying Item 4, every 6 bedrooms is deemed to comprise a dwelling. That is, 8 bedrooms divided by 6 is 1.3, rounded to 1. There is deemed to be 1 dwelling.</p> <p>Example 5— A relocatable home park has 45 relocatable dwellings (each relocatable dwelling has less than 6 bedrooms). In applying Item 4, there are 45 dwellings.</p>
Conditions	For bulk bin collection services, the conditions in <i>Item 3C. Bulk bin collection services—Conditions</i> apply.	

7. Additional waste collection services for domestic premises

Service	The following collection services are available as additional services. The additional bulk bin services are not available to dwelling houses or dual occupancies.	
	Domestic waste	140 litre wheelie bin, serviced once per week
		240 litre wheelie bin, serviced once per week
		1,000 litre bulk bin, serviced 1, 2 or 3 times weekly
		1,100 litre bulk bin, serviced 1, 2 or 3 times weekly
		1,500 litre bulk bin, serviced 1, 2 or 3 times weekly
		2,000 litre bulk bin, serviced 1, 2 or 3 times weekly
		3,000 litre bulk bin, serviced 1, 2 or 3 times weekly
	Recyclable waste	140 litre wheelie bin, serviced once per fortnight
		240 litre wheelie bin, serviced once per fortnight
360 litre wheelie bin, serviced once per fortnight		

10. Commercial and industrial premises

Service	The commercial waste and recyclable waste collection services that can be requested by the owners, property managers or bodies corporate of commercial and industrial premises are as follows:	
	Commercial waste	140 litre wheelie bin, serviced 1 – 7 times weekly
		240 litre wheelie bin, serviced 1 – 7 times weekly
		1,000 bulk bin, serviced 1 – 7 times weekly
		1,100 bulk bin, serviced 1 – 7 times weekly
		1,500 bulk bin, serviced 1 – 7 times weekly
		2,000 bulk bin, serviced 1 – 7 times weekly
		3,000 bulk bin, serviced 1 – 7 times weekly
	Recyclable waste	140 litre wheelie bin, serviced once fortnightly
		240 litre wheelie bin, serviced once fortnightly
360 litre wheelie bin, serviced once fortnightly		
1,100 bulk bin, serviced once per week		
Conditions	For bulk bin services, the conditions set out in <i>Item 3C. Bulk bin collection services—Conditions</i> must be complied with.	

11. Commercial premises: Council properties

Service	The full range of domestic waste and recyclable waste collection services for commercial premises detailed in <i>Item 10—Commercial and industrial premises</i> above are available to Council properties.	
Levying of charges	Wheelie bins on properties administered by Council's Community Services branch eg. sporting clubs, community centres, Girl Guides, Boy Scouts and Meals on Wheels	All collection services will be the subject of waste management utility charges levied through Council's rating system.
	Park wheelie bins, park litter bins, street wheelie bins and street litter bins	Council's Health, Environment & Waste branch will charge the relevant Council branch directly for the service. Such charge may include an administration component.
	Bulk bins	Council's Health, Environment & Waste branch will charge the relevant Council branch directly for the service. Such charge may include an administration component.

12. Green waste collection service

Service	140 litre, 240 litre or 360 litre wheelie bin, serviced fortnightly	
Conditions	<p>Storage and collection</p> <ol style="list-style-type: none"> 1. Green waste bin to be stored on the property. 2. Green waste bin to be presented on the kerbside for collection. 3. If it eventuates that there is insufficient storage or presentation space, the service will be cancelled, the bin removed and all charges cancelled/refunded. <p>Application</p> <ol style="list-style-type: none"> 4. Standard application is for one or two bins. Requests for more than two bins will be assessed by Council, by inspection if necessary. 5. In making an application for a green waste bin, applicants are confirming that they have adequate space to store the bin on their property and present the bin on the kerbside for collection. 6. Applications for green waste bins may be made by: <ol style="list-style-type: none"> (a) Property owner, who will pay for the service via their rate charges; and (b) Non-owner occupiers (renters) - and in these circumstances the following conditions apply: <ol style="list-style-type: none"> (i) The application must be accompanied by advance payment for 12 months of service. (ii) A service renewal invoice will be forwarded to the applicant at least 30 days prior to the expiration of the 12 months of service. Failure to pay the invoice prior to the due date will result in the service being withdrawn. (iii) The service may be cancelled by the resident at any time, but no refunds will be paid for unused service. 7. Owners and non-owner occupiers of units in multi-unit complexes (both domestic and commercial) may apply for green waste bins, but their applications must contain the written approval of the body corporate or property manager confirming that there is no objection to use of the bin, and that there is adequate space to both store and present the bin for servicing. 8. Acceptable and not acceptable green waste bin contents are as follows. 	
	<p>The only acceptable items that can be placed in the green waste bin</p> <ul style="list-style-type: none"> • garden prunings • grass clippings • shrubs (shake off the soil) • weeds (shake off the soil) • leaves and loose bark • palm fronds (fronds must be cut so they can fit into the bin, bent palm fronds can get stuck in the bin preventing it being emptied) • small branches (no more than 15 centimetres in diameter and 40 centimetres in length) • newspaper to line the bin so that grass clippings do not stick to the bottom 	<p>The following items cannot be placed in the green waste bin</p> <ul style="list-style-type: none"> • plastic bags (green waste must also not be put into bags) • general waste • nappies (including compostable nappies) • recyclable waste • kitchen waste, including fruit, vegetable and meat scraps • animal droppings • large logs, branches and stumps • garden hoses or tools • rocks and building materials • treated, composite or painted timber • potting mix, soil and ash • plant pots • hazardous waste • batteries or chemicals
