

Logan Water
Performance Report
2022–2023

Our Purpose

As a water service provider, Logan Water provides safe, reliable and sustainable water and wastewater services for the benefit of the Logan community. We are a water utility focused on reliable, cost-effective, high-grade service delivery.

Our ambition is to realise sustainable opportunities for the City of Logan to be stronger, greener, and smarter.

Our commitment to innovative technology and integrated ways of working creates a future worth investing in.

Our Vision

Reliable. Sustainable. Committed.

Our Objectives

Our strategic objectives provide the focus for achievement of our ambitions. They drive our priority setting, resource allocation, capability requirements and budgeting activities.

Effortless Customer Experience

- We ensure our customers get what they need and expect
- > We deliver, what we say is what we do

Resilient Infrastructure

We provide infrastructure to meet the growth challenges of the future

Future-Ready People

- We trust each other to drive a safe and supportive culture
- We are one innovative and high performing team
- We make Logan Water a great place to work

Enhanced Sustainability

- We drive long term viability by managing cost, service and commercial return
- We enhance our natural and built environment
- We measure and improve our performance, systems, and information

Acknowledgement of Country

We acknowledge the Yugambeh people as the Traditional Custodians of the country on which we work. We honour Elders past and present, whose knowledge and wisdom has ensured the continuation of culture and traditional practices.

We respect the deep cultural and spiritual connections that our local peoples have with the land and water, and its importance to cultural vitality, life and identity.

About this report

This report contains Logan Water's performance against a broad range of Key Performance Indicators (KPIs). The information contained in this report meets Logan Water's obligation under section 575 of the *Water Supply (Safety and Reliability) Act 2008*.

The KPIs primarily cover the following areas:

- Water supply security
- > Service delivery
- Customers
- > Financial
- Water resources
- Assets
- Environment
- > Pricing

This report outlines our performance against:

- > key performance indicators determined by the Regulator
- > National Performance Reporting indicators
- > our customer service standards.

Our Customer Service Standards

Customer service standards provide customers with an understanding of the levels of service they can expect to receive from their water service provider. Our customer service standards and customer commitment statement for water and wastewater services can be found on our website.

Our Annual Report

As a commercial business unit of Logan City Council, Logan Water reports on our Annual Performance Plan in Council's Annual Report. It informs our community and stakeholders about our performance and achievements. Our Annual Report can be found on our website.

Highlights of 2022–2023

Managed over **23,000**customer contacts

5,760 commerical and industrial water connections

Over 24,000 ML delivered drinking water

3,919 installled panels

4,925 commerical & ir

commerical & industrial wastewater connections

138 wastewater pumping stations

More than **25,000** fire hydrants

23 reservoirs G

Generates

2,400 MWhs
of renewable energy
every year

1.5 MWs installed solar

32,000 MWh of energy recovered per year

Over 10,000 lab samples tested per year Over **459,000** water meter reads

2,497 km water mains

4 wastewater treatment plants

Servicing over **345,000** people

Over **115,000** water meters

Interpreting our performance

Where the measure relates to Logan Water and data is available, the result is shown. This includes '0', which means the activity or function applied to us and our result for the period was 0. In all other cases, the following applies:

- > NR (Not relevant) An activity or function we do not undertake.
- MD (Missing data) An activity or function we may undertake; however reliable data is not available for the reporting period.
- > N/A (Not applicable) An answer is not required.
- > Zero (0) An activity we usually undertake, however for the financial year we did not do the activity.

Performance against Queensland Government – Key Performance Indicators

General

The Queensland Government (QG) Key Performance Indicators (KPIs) relating to water supply and sewerage infrastructure include the number of treatment plants, capacity, length of mains and connections, i.e. the infrastructure in place to deliver the service in each scheme. The QG KPIs relating to water sourced and supplied provide overall water balance information for each scheme.

Assets

Information on water and wastewater assets supports an understanding of the level and complexity of the water and wastewater network. Information about water main breaks and sewer breaks and chokes supports an understanding of the condition of the water main and sewer networks. Information on water supply losses supports an understanding of the performance of the distribution network.

Restoring services following unplanned interruptions	An interruption commences when the water utility is aware that the water supply or wastewater service is interrupted and ceases when 'normal' service is restored.	Aiming to restore normal service levels within five hours.	91%	95.7%	95.3%

^{*} Logan Water's reported numbers represent approximately 2% of the total volume of customer contacts and works orders created through a year. The total number of jobs matching the reporting criteria that didn't achieve the performance objectives was 70 jobs out of a total workload received by Logan Water of almost 10,000 jobs. Logan Water is actively working to upgrade its works management system to enable enhanced management of jobs to support achievement of its performance objectives.
