

Request for a Tankering Agreement

Prior to completing this form

New developments are often conditioned to be connected to Council's wastewater network prior to plan sealing or prior to their commencement of use. However, there may be exceptional circumstances where Council would be prepared to defer the connection to the existing wastewater network that would result in the need for wastewater from the proposed development to be collected and conveyed by the developer to a nominated discharge location for a short period of time.

Developers are encouraged to contact Council's Water Development Services Program, at WaterDA@logan.qld.gov.au or by phone on (07) 3412 3412, at their earliest possible opportunity should they be contemplating tankering. It should be noted that Council is under no obligation to support a request for tankering.

Applicant details:

The applicant is the person responsible for making the request. It does not need to be the owner of the land. The applicant must make sure information provided in this form is correct. Any correspondence issued in response to this request will be to the applicant.

Supporting Information:

1. Site plan

- The site plan should:
- detail the location of the proposed tankering facility;
- detail the location of any existing and proposed buildings;
- detail the location of any existing and proposed residential and commercial properties;
- detail the location of any waterways or environmentally sensitive areas;
- provide the lot and plan numbers; and
- be to scale.

2. Tankering Management Plan

- The Tankering Management Plan (TMP) should include, but is not limited to, the following:
- details of the tankering operations;

- a copy of the contract with the tankering contractor;
- a proposed tankering schedule based on the projected wastewater loads;
- design details and storage capacity calculations for the tankering facility;
- details about the monitoring and warning systems for the tankering facility;
- details about the ongoing reporting of the tankering operations;
- details of the environmental safeguards and odour emission control measures;
- details of the emergency procedures and the emergency contact list;
- details about the security being provided for the tankering facility; and
- details about the decommissioning and removal the tankering facility.

3. Additional information

- Please include any additional information that will help the assessing officer understand what you want to achieve by entering into an agreement.
